Medical Abortion is Safe and QuickIt involves taking a medication called Mifiprex and any other pill that we see fit for you. We require you to get home immediately as the process begins as soon as you have taken the pill.

+27717852514

We provide medical (abortion pill) and the vacuum aspiration methods of abortion.

You will experience cramping and vaginal bleeding at home, much like a miscarriage. A follow-up visit in 1 to 2 weeks is very important to make sure the uterus is empty. This method can only be done very early in the pregnancy.

It is a relatively simple procedure which in and of itself takes less than 10 of pregnancy, even if you have just barely missed your period.

All of our appointments are individual, personal and private. You will have our full attention.

Many sources give false information about woman's rights and the risk associated with abortion. Medical research confirms that uncomplicated first trimester abortions do not cause future miscarriages, infertility, breast cancer, or depression.

You will be fine within hours. You will be able to great pregnant again, if and when you want to. You will be fine as medical abortion is the safest method of dealing with unwanted-pregnancies.
